

INSODEC -Thermal Emulsion Paint (5 Litre)

Insodec Thermal Emulsion has unique insulating properties which help to reduce heat loss through your walls and ceilings. The insulating cenospheres within Insodec Thermal Emulsion form an effective barrier reflecting radiant heat back into your room, maintaining room temperature and improving the comfort factor of the room.

Condensation is also reduced by Insodec Thermal Emulsion. Nano sized cenospheres increase the dew point of the wall surface, which helps to reduce the conditions for condensation and the formation of black mould.

Acoustic performance of the wall is also enhanced by Insodec Thermal Emulsion, because the ceramic formulation of the Insodec Cenosphere helps improve acoustic levels.

Insodec Thermal Emulsion is a water and clay based paint and is rated minimal VOC. It offers the perfect balance of excellent quality and performance with a noticeably superior texture and finish.

Specification & use

- Matt & Midsheen finish.
- Eggshell recommended for use in Bathroom & Kitchens.
- Internal applications.
- Ideal for Ceilings and walls.
- Minimum two coat application.
- Dilute for new plaster wash-coat.
